

CEO Water Mandate Virtual Workshops

Member speaking invitation | 2026–2027 workshop series

Turn practical experience into collective action

Members selected the water stewardship priorities shaping this series. Now we're inviting member companies to share practical experience, challenges and lessons—helping peers act faster while strengthening your organization's leadership in water stewardship.

2026 — Share What Works

Two opportunities to contribute this year

- **October 2026 — Nature in Practice:** Share how your business embeds biodiversity and nature-based solutions—then exchange practical lessons in facilitated breakouts.
- **December 2026 — Building for the Future:** Show how you are strengthening long-term water resilience across operations and value chains.

2027 — Shape What Comes Next

Member-selected priorities | Dates to be confirmed

- **Engaging supply chains for water impact**
- **The future of corporate water stewardship: PWI insights**
- **From site to basin: collective action at scale**
- **Setting meaningful water targets that work**
- **Collaboratives in action: what worked and what didn't**
- **Aligning water, nature and climate across the business**
- **Water resilience in practice: from risk to readiness**

Ready to Share What Works?

Lead a 10–15 minute case example. The Mandate team will help shape your story, moderate the discussion and manage logistics.

Act now: Email Hellen Mwarasomba with the experience you can share—or propose a topic for future peer learning.
